

Westlake LF aerial rad survey
Dan Gravatt to: Timothy Curry

Tim, following up on our call on the 18th, we have a couple of other details for you to consider adding to the mission order for West Lake:

- Aerial thermal scan to look for the boundaries of the landfill fire in the Former Active Sanitary Landfill cell.

- Extending the gamma scan area outside the site proper to include the trailer park (visible in the southeast corner of the Airphoto2 I sent you) and Spanish Village (kind-of oval area west of the "I-270" symbol on Airphoto1, about 3/4 -1 mile south of the rad areas).

Let me know if these are doable and what impact they would have on costs, etc. I imagine the thermal scan would have to be done when it's night, or cold, or both?

Thanks,
Daniel R. Gravatt, PG

Tim, today won't work; I have a public meeting on West Lake tonight. Tomorrow after about 2PM would probably work for me. Give me a number to call then and I'll bring you up to speed on the site and what we want to do with ASPECT. Take a look at the attached airphotos to help you get oriented. The site is the mostly-bare, irregularly shaped area with "63044" on it in the first airphoto, west of the end of the westernmost runway. OU1 has the radiological contamination and is in two non-contiguous areas shown on the second airphoto.

Subject: Conference call on Westlake LF aerial rad survey.

Hello Dan, the whole ASPECT team is together in DC for the inauguration. We can get together on a conference call today or tomorrow if you have some time. The weather sucks for the next two days so we are working on maintenance squawks for the system. We can be available whenever it works for you. We would like for you to give us the general background information on the site over the phone and let us know what your needs are and then we can discuss what is possible. The call should take about a half an hour (unless we start going into technical details and then it could go on for awhile).
